

Swiss Tech Top Quality Q.Light 70

Q.Light stimulates natural skin and tissue regeneration, stimulates cellular processes, supports the immune system and blood circulation. Q.Light therapy can be used to treat many cosmetic conditions as well as improve skin, tissue and muscle tone. Treatments are designed to penetrate deep into the tissues by utilizing different wavelengths of light.

The system works by stimulating a natural cellular regeneration and repair process resulting in treatments that are quick and painless. Q.Light therapy devices are an optimal complement for traditional treatment methods.

Q.Light® Therapy products are ISO 9001-2000 & ISO 13485 certified.

Q.Light therapy optimizes:

- blood circulation of the skin
- oxygen supply
- regulation of skin functions
- cell metabolism
- cell respiration
- cell renewal
- tissue development and stability
- skin elasticity
- skin protection
- skin suppleness
- moisturizing of the skin
- skin relief & feel

Recommended for:

- healing of (chronic) wound
- reduction of pain
- improvement of skin diseases
- improvement of the state of mood
- regulation and balance of immune parameters
- regulation and balance of neuro-immunological immune parameters
- regulation and balance of endocrinological parameters
